

Kaba Master Key Systems For Your Personal Security

Investment Security

Kaba lock cylinders are built in a modular system. This makes it possible to modify cylinders as required simply and quickly by authorized dormakaba dealers. The modular design increases the flexibility of the system and provides the highest level of investment security.

Upward compatible with Kaba evolo

A mechanical key system can be integrated into an electronic access system at any time. Kaba keys can be upgraded to an electronic key by simply exchanging the key clip for use with all Kaba evolo readers, cylinders and door furniture. Kaba evolo keys offer combined mechanical and electronic identification in one single unique medium.

Authorised dormakaba partner:

01

Kaba elolegic Compact Cylinder

The electronics and battery are installed in the inside knob. No modifications are required when installing on the door.

02

Kaba elolegic Digital Cylinders

The electronics and battery are installed in the inside knob. Suitable for applications without mechanical keys.

03

Kaba elolegic c-lever

The intelligent door furniture transforms any door into a stand-alone access control system and can be used with any standard mortise door lock.

Master Key Systems

Keyed Alike Cylinders

The Key System for Your Home

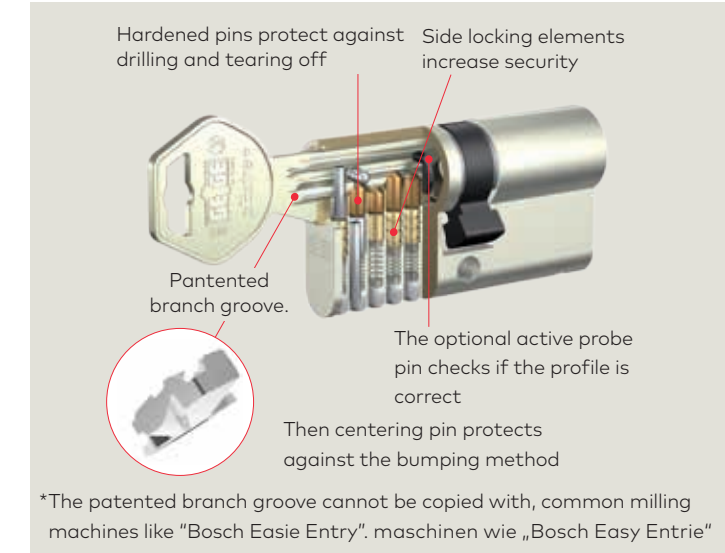

dormakaba and central lock systems make it possible to assign access privileges for your private home, business or practice. You define, who may have access where and with which key.

One Key for All

dormakaba systems can be used in all types of lock cylinders (double and single cylinders, thumbturn cylinders, camlocks, furniture locks, padlocks, key switches, etc.) What is special: You can order your lock cylinders so that they all can be locked and unlocked with a single key (keyed alike lock cylinders).
